

Call for Papers

The 7th symposium, PSE Asia 2016, will be held at the University of Tokyo, Japan from 24th July to 27th July 2016. In addition to oral and poster presentations on recent developments in process systems engineering, there will be several keynote presentations. We warmly invite you to attend the PSE Asia 2016.

Abstract should be written in English. The length of the abstract should not exceed one A4 page (word count of approximately 500–600 words). Detailed information will follow on the symposium website.

Contributions are widely invited from the PSE community in academia and industry. All papers will go through peer review and will be included in the symposium proceeding. Every paper for inclusion in the symposium proceedings must have at least one author who has registered for the symposium with payment by 30 Apr. 2016. The copyrights to the papers are not requested to be transferred to the symposium organization.

Extended version of selected papers will be invited to submit to a special issue in Journal of Chemical Engineering of Japan (JCEJ) without publication charges.

Important Dates:

30 Sep. 2015	Deadline for abstract submission
31 Oct. 2015	Notification of abstract acceptance
31 Dec. 2015	Deadline for full paper submission
29 Feb. 2016	Notification of full paper acceptance
15 Apr. 2016	Deadline for early bird registration
30 Apr. 2016	Deadline for registration with paper inclusion in proceeding
24–27 July 2016	Symposium

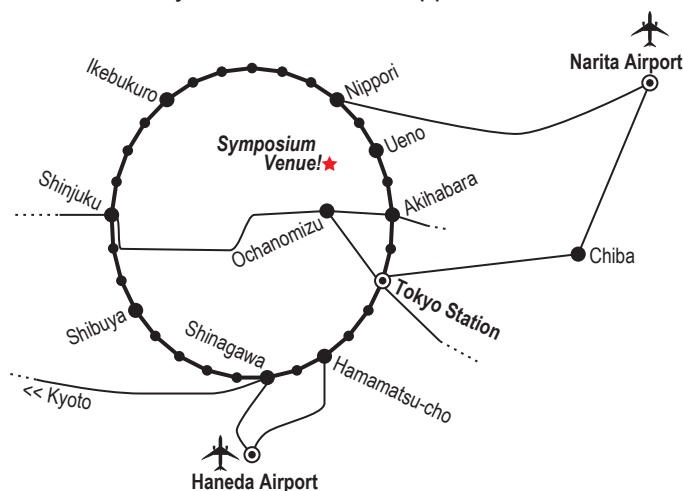

Symposium Venue: Ito International Research Center

Address: 7-3-1 Hongo, Bunkyo-ku, Tokyo, Japan
(on Hongo Campus of the University of Tokyo)

From & To Symposium Venue:

From Narita Airport:	Approx. 90 mins.
From Haneda Airport:	Approx. 65 mins.
From Tokyo Station:	Approx. 15 mins.

About Symposium

The International Symposium on Design, Operation & Control of Chemical Processes (PSE Asia) is a symposium held in Asia for researchers and practitioners in the field of process systems engineering. The first symposium was held in 2000 in Kyoto, Japan, and provided great opportunities to promote interactions and collaborations among researchers and engineers in Asian countries. After the success of the first symposium, PSE Asia has been held in Taipei (2002), Seoul (2005), Xi'an (2007), Singapore (2010), and Kuala Lumpur (2013).

Topics & Scopes

The symposium will include, but not limited to, following topics and scopes:

- Modeling and simulation
- Process and product design
- Process dynamics and control
- Process monitoring and safety
- Process operation and optimization
- Process integration and management
- Cyber-infrastructure and intelligent systems
- Energy systems and sustainability
- Food and pharmaceuticals
- Industrial applications
- Domain applications (biological, environmental, social, etc.)
